

This is to petition the FCC to strongly consider keeping FM translators to radio stations that broadcast nationally and/or regionally.

I listen to K-Love which is broadcast from Texas to my home in Florida and would be devastated if i could no longer receive this station.

K-Love is an important part of my time in the car every day. I have 2 small children that love to listen without issues of perverted or inappropriate language/content. It encourages me and gives me a better attitude as i drove around town - making me a better more courteous driver.

The effects on the local community here in Tallahassee would truly be devastating as there is such a need for wholesome family values broadcast over the airwaves instead of inappropriate and foul content. I truly believe people in our community would fight this tooth and nail to keep this station on.

I believe K-Love serves an important role in the local community by encouraging us, keeping us focused on wholesome family radio music, bringing others hopeful thoughts and faith-filled encouragement in a time where the public usually gets cynicism, hopelessness and ugliness.

Please do not take away the FM translator priority service.

Sincerely,
Kelli Wynn
